

PRESS RELEASE

PRYSMIAN SUCCESSFULLY COMPLETES THE DOLWIN3 OFFSHORE WIND FARM PROJECT IN GERMANY

THE CONTRACT WAS AWARDED BY ALSTOM GRID ON BEHALF OF THE DUTCH-GERMAN GRID OPERATOR TENNET

PRYSMIAN GROUP PROVIDED THE DESIGN, SUPPLY AND INSTALLATION OF THE CABLE SYSTEMS

Milan, 13 November 2019 - Prysmian Group, world leader in the energy and telecom cable systems industry, announces the successful commissioning of the High Voltage Direct Current (HVDC) offshore grid connection project DolWin3, off the German North Sea coast.

Prysmian had secured this project in February 2013, with a contract awarded by Alstom Grid (now GE Grid GmbH) on behalf of the Dutch-German grid operator TenneT.

DolWin3, the third offshore grid connection in the 'DolWin' cluster, links the offshore converter platform DolWin Gamma, located approximately 85 km offshore in the North Sea, to the German mainland with the purpose of transmitting clean and renewable energy into the national grid. As a one-stop-shop service provider, Prysmian was responsible for the supply, installation and commissioning of the High Voltage Direct Current (HVDC) ± 320 kV extruded submarine and land power cable connections with a rating of 900 MW and the associated fibre optic cable system, covering a 78 km land route and an 83 km subsea route.

The cables were produced at the Prysmian Group's centres of technological and manufacturing excellence in Arco Felice (Italy), Pikkala (Finland) and Delft (The Netherlands).

"We are very proud of having contributed to the development of such an important renewable energy project proving our ability to provide tailor-made submarine cable solutions to support the growth of clean energy in Northern Europe," stated Hakan Ozmen, EVP Projects, Prysmian Group.

The completion and handover of this important project further confirms the Group's ongoing successful relationship with TenneT, which in recent years has awarded a total of seven HVDC grid connection projects to Prysmian, including BorWin2 & BorWin3, Helwin1 & Helwin2, SylWin1 and the recently awarded Dolwin5.

Prysmian Group

Prysmian Group is world leader in the energy and telecom cable systems industry. With almost 140 years of experience, sales exceeding €11 billion, about 29,000 employees in over 50 countries and 112 plants, the Group is strongly positioned in high-tech markets and offers the widest possible range of products, services, technologies and know-how. It operates in the businesses of underground and submarine cables and systems for power transmission and distribution, of special cables for applications in many different industries and of medium and low voltage cables for the construction and infrastructure sectors. For the telecommunications industry, the Group manufactures cables and accessories for voice, video and data transmission, offering a comprehensive range of optical fibres, optical and copper cables and connectivity systems. Prysmian is a public company, listed on the Italian Stock Exchange in the FTSE MIB index.
