

PRESS RELEASE

PRYSMIAN GROUP AT ANGA COM TRADE FAIR 2019

THE GROUP TO SHOWCASE ITS MOST ADVANCED TELECOM PRODUCTS DESIGNED TO MEET THE EVOLVING NEEDS OF ITS CUSTOMERS

Milan, 3 June 2019 - Prysmian Group, world leader in the energy and telecom cable systems industry, will present its latest innovations for quality, future-proof networks at ANGA COM Trade Fair 2019, taking place on June 4-6 in Cologne, Germany.

At its booth in Hall 7 / B71, Prysmian Group will showcase its 6,912 fibre MassLink™ cable with FlexRibbon™ technology, which provides the highest fibre count within the industry and made its European debut in March at the FTTH Council Europe Conference in Amsterdam. The 6,912 fibre FlexRibbon provides an ultra-compact outside plant cable design that contains 6,912 bend-insensitive fibres, with a cable diameter small enough to fit into a 50.8mm duct.

In Prysmian's FlexRibbon™ cable family, ribbons are rolled up and packed together in small diameter sub-units, still providing the advantages of mass fusion splicing, while significantly reducing the outside diameter of the cable. Originally designed for use by hyper-scale data-centre customers, FlexRibbon™ has potential uses in all telecom markets. Whatever the fibre count in a single cable, this product design provides installers and splicers with craft friendliness and superior fibre management.

At its booth, the Group will also showcase its range of advanced products to meet the evolving needs of its customers, including its full offer for optical connectivity solutions providing flexibility in design, simple modularity for upgrading and superior quality performance for all cable management needs. Moreover, Prysmian will showcase the Karona Overblow System enabling the installation of high density optical fibre cables into pre-existing sub-ducted routes, that contain existing legacy cables, as well as its portfolio of multi-conductor FTTH hybrid cables for mobile applications. Live cable jointing demonstrations will also be available throughout the day.

"Prysmian Group is a global company with a strong presence in Europe and Germany, offering a long-standing experience in the manufacturing of optical fibre and cable solutions for a broad range of applications" stated Toni Bosch, Vice President Telecom Solutions at Prysmian Group. "With seven research and development centres, Prysmian Group is the largest cable manufacturer in Germany and across the whole Europe. The high level of local technical expertise available allows us to respond quickly to new requirements and to offer our customers tailor-made solutions of truly high quality, providing important impetus for tomorrow's telecommunications networks and power grids."

Prysmian Group

Prysmian Group is world leader in the energy and telecom cable systems industry. With almost 140 years of experience, sales exceeding €11 billion, about 29,000 employees in over 50 countries and 112 plants, the Group is strongly positioned in high-tech markets and offers the widest possible range of products, services, technologies and know-how. It operates in the businesses of underground and submarine cables and systems for power transmission and distribution, of special cables for applications in many different industries and of medium and low voltage cables for the construction and infrastructure sectors. For the telecommunications industry, the Group manufactures cables and accessories for voice, video and data transmission, offering a comprehensive range of optical fibres, optical and copper cables and connectivity systems. Prysmian is a public company, listed on the Italian Stock Exchange in the FTSE MIB index.
