

**PRESS RELEASE****PRYSMIAN SUCCESSFULLY COMPLETES GRISSAN/EOLMED FLOATING OFFSHORE WIND FARM EXPORT CABLE IN FRANCE****STRONG COMMITMENT TO PROJECT EXECUTION IN SUPPORT OF THE DECARBONISATION**

Milan, 30 May 2024 - Prysmian, world leader in the energy and telecom cable systems industry, announces the successful completion of the Grissan/EOLMED floating offshore wind farm project in France. Prysmian had secured this project in 2021 with a contract signed with the French TSO RTE (Réseau de Transport d'Électricité) for the Engineering, Procurement, Construction and Installation (EPCI) of an export submarine power cable system.

Prysmian was responsible for the design, supply, installation, termination, testing, and commissioning of a 66 kV static three-core export submarine cable with EPR insulation for a total of 23 km and a 66 kV dynamic submarine export tail with EPR insulation connecting the onshore grid to the floating electrical hub of EOLMED's 30MW offshore floating wind farm (currently under construction).

With this high-profile engineering project and 2<sup>nd</sup> EPCI turnkey project for dynamic cable systems, Prysmian has further consolidated its position in the floating offshore wind farm market, deploying its knowledge, experience, and capability to provide innovative dynamic cable systems solutions that allow to build offshore wind farms in deeper water areas.

"With this project, which follows Provence Grand Large (PGL) floating offshore wind farm, Prysmian demonstrates once again its leading position in the market and the validity of its know-how and technologies in the development of submarine cables and systems to support smarter and greener power grids worldwide" commented Alberto Boffelli, COO Transmission, Prysmian.

**Prysmian**

Prysmian is a global cabling solutions provider leading the energy transition and digital transformation. By leveraging its wide geographical footprint and extensive product range, its track record of technological leadership and innovation, and a strong customer base, the company is well-placed to capitalise on its leading positions and win in new, growing markets. Prysmian's business strategy perfectly matches key market drivers by developing resilient, high-performing, sustainable and innovative cable solutions in the segments of Transmission, Power Grid, Electrification and Digital Solutions. Prysmian is a public company listed on the Italian Stock Exchange, with almost 150 years of experience, about 30,000 employees, 108 plants and 26 R&D centres in over 50 countries, and sales of over €15 billion in 2023.
