Sales breakdown by geography

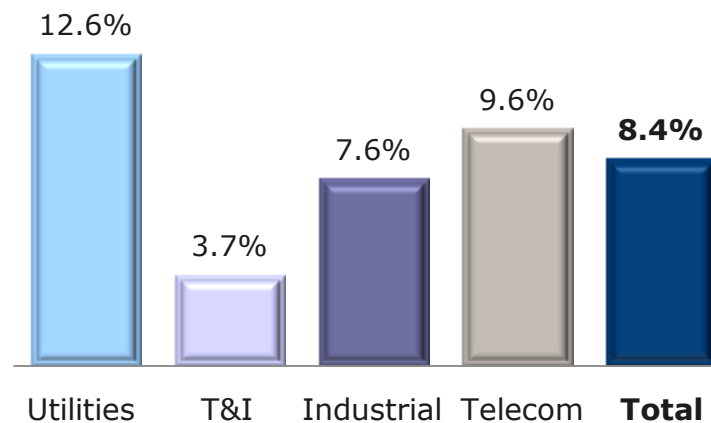

Sales breakdown by business

Adj. EBITDA by business

Adj. EBITDA margin by business

2013 Key Achievements

FY targets achieved despite continuous weak economic environment and negative exchange rates

- Adj. EBITDA at **€ 612 million**:
initial guidance (€ 600-650 million) achieved despite € 23m of negative exchange rates effect (mainly in H2). Adj.EBITDA excl. exchange rate effects at € 635m in the high part of the range

- Net Financial Position at **€ 834 million**:
improving from € 918m as of Dec'12 and better than initial expectations
- Sound balance sheet:
Net Financial Position / Adj. EBITDA at **1.4x** (in line with FY2012)
- Free Cash Flow at **€ 170 million** ⁽¹⁾ (from € 284 million in FY2012)
despite approx. € 100m cash-in related to submarine business anticipated in 2012
- Cumulated Synergies at **€ 120 million** (vs. € 100 million target)

(1) Free Cash Flow levered excluding acquisitions, dividends paid and other equity movements

Adjusted EBITDA

Note: FY2011 combined including Draka for 12 months

Highlights

DISTRIBUTION

- New bottom in H2'13 due to continuous decrease in utilities capex (mainly in Europe). No volume recovery expected in the short term (based on current order-book). Trough in profitability despite on-going cost rationalization
 - Europe: weak demand in all European countries except UK. Major reduction in Italy and Germany. Further volume deterioration expected in the next quarters
 - North America: double digit volume growth in 2013, positive demand expected to continue in 2014
 - South America: sales decrease in 2013 due to selective volume strategy to preserve profitability. Gradual recovery expected in 2014
 - APAC: lower contribution due to Australia and Indonesia. Expanding business in other Asean regions to sustain next quarters recovery

TRANSMISSION – HV

- As expected, strong contribution in Q4 driving higher FY profitability Vs 2012
- Margins improvement thanks to better projects mix: leadership in high technology projects and growing contribution land portion of submarine projects
- Reasonable visibility on FY2014 based on current order-book
- Europe still main market. Growing demand in Australia, North & South America, Middle East

TRANSMISSION – Submarine

- Double digit growth in sales and profitability driven by orders backlog and flawless execution
- High growth expected in profitability in the coming years (based on current order-book)
- Next quarters order intake supported by large interconnections
- Production capacity increase in Arco Felice (Italy) completed to sustain double digit increase in 2014
- Cable Enterprise vessel upgrade to enhance installation capacity. No contribution in H2'14

Utilities

Growth in Transmission sustained by strong order-book

Trade & Installers

Euro Millions, % on Sales

Sales to Third Parties

* Organic Growth

Note: FY2011 combined including Draka for 12 months

Adjusted EBITDA

Note: FY2011 combined including Draka for 12 months

Highlights

- Gradual volume improvement in H2'13 Vs. bottom level achieved in H1. Profitability still under pressure due to currencies and price
 - Europe: demand still at low level in all major countries, gradual recovery expected in the Nordics, Eastern Europe and UK
 - North America: positive trend in construction and renewed wind incentives to sustain volumes in the next quarters
 - South America: higher contribution in 2013, despite negative currency effect, thanks to growing demand and stronger market position
 - APAC: significant decrease in profitability due to weak Australian market and higher competition. Underlying construction activity expected to recover through 2014

Industrial

Euro Millions, % on Sales

Sales to Third Parties

* Organic Growth

Note: FY2011 combined including Draka for 12 months

Adjusted EBITDA

Note: FY2011 combined including Draka for 12 months

Highlights

OGP

- Lower sales and profitability Vs previous year due to major decrease in on-shore business and postponement of off-shore projects in Singapore expected to be executed in 2014. Strengthening presence in South America, Middle East and Apac

SURF

- Growth in Umbilicals thanks to higher activity with Petrobras and new projects out of Brazil. Still limited visibility on 2014 for flexible pipes
- DHT: growing contribution expected to continue in 2014 thanks to solid demand with consolidated US customers and new orders from Petrobras

Elevator

- Double digit growth driven by successful development in Apac and Europe. Positive volume trend expected to continue in next quarters

Renewable

- In 2013 bottom demand in North America and China. Improving order-book in North America (incentives renewed), South America and Europe

Automotive

- Positive demand in North and South America expected to continue in 2014 to offset weak European market

Specialties & OEM

- Increasing results despite still weak European market thanks to commercial initiatives to develop high margin products: Railway/Rolling Stock (North and South America, Europe); Crane (Apac, Europe)

Industrial

New commercial initiatives delivering results out of Europe in OEMs, OGP & Surf and Elevator

FY 2013

Sales to Third Parties

* Organic Growth

Note: FY2011 combined including Draka for 12 months

Adjusted EBITDA

Note: FY2011 combined including Draka for 12 months

Highlights

- Gradual improvement in organic change (Vs previous year) thanks to weak comparable basis from H2'13. Profitability strongly penalized by lower volumes and negative currency effect (e.g. South America, US, Australia).

Optical / Fiber

- Europe:** positive demand evolution expected in the next quarters mainly thanks to France and Spain FTTH deployment in a tough competitive environment
- North America:** still weak demand with no signs of improvement. Uncertainty on incentives renewal limit short term recovery
- South America:** first projects submitted for stimulus packages approved. Growing demand expected through the year
- APAC:** China maintaining high investments in all applications (Backbone, Metropolitan Ring and Access network) supporting positive demand. NBN project in Australia slowing down due to installation bottleneck and Government policy change

Multimedia & Specials

- Lower volume in 2013 due to postponement of data centers investments in major European countries (e.g. Germany, France, UK). Focus on extending activity outside of EMEA.

Utilities – Power Transmission

Business description

High/extra high voltage power transmission solutions for the utilities sector

- **Underground High Voltage**

Cabling solutions for power plant sites and primary distribution networks

- **Submarine High Voltage**

Turnkey cabling solutions for submarine power transmission systems at depths of up to 2,000 meters

- **Network components**

Joints, connectors and terminations for low to extreme high voltage cables suitable for industrial, building or infrastructure applications and for power transmission and distribution

Key customers

Customer base drawn from all major national transmission networks operators

Utilities – Investing in submarine to increase ROCE

Strengthening production and installation (GME acquisition) capabilities

Arco Felice (Italy)

Drammen (Norway)

Pikkala (Finland)

Utilities – Submarine Systems

Key success factors

- Track record and reliability
- Ability to design/execute turnkey solution
- Quality of network services
- Product innovation
- State-of-the-art cable laying ship

Action plan

Increased installation capacity thanks to GME acquisition.
Capacity expansion completed in Pikkala. Ongoing capacity increase in Arco Felice and Drammen to support growth next years through:

- Leverage on strong off-shore wind-farms trend
- Secure orders to protect long-term growth
- Focus on flawless execution

Utilities – Western Link a milestone in the submarine sector

Confirmed leadership in terms of know-how and innovation capabilities

Western Link route

Western Link milestones

- The highest value cable project ever awarded, worth **€800 mln**
- The highest voltage level (**600kV**) ever reached by an insulated cable
- Currently unmatched transmission capacity for long-haul systems of **2,200MW**
- **Over 400km** of HVDC cable, bi-directional allowing electricity to flow north or south according to future supply and demand
- First time HVDC technology has been used as an integral part of the GB Transmission System
- Commissioning scheduled by late 2015

Large Off-shore Wind investments planned in Scotland

Source: www.offshorewindscotland.org, www.westernhvdlink.co.uk

Market drivers

- Long term growth in electricity consumption
- Mandated improvements in service quality
- Investment incentives to utilities
- Urbanization

Key success factors

- Time to market
- Quality of service
- Technical support
- Cost leadership
- Customer relationship

Key customers

Key customers are all major national distribution network operators

Action plan

- Improve service level and time to market
- Reduce product cost
 - Cable design optimization
 - Alternative materials / compounds introduction
 - Process technologies improvement
- Innovate
 - New insulation materials
 - P-LASER launch in Europe

Business description

- Low voltage cables for residential and non residential construction
- Channel differentiation with both:
 - Direct sales to end customers (Installers)
 - Indirect sales through
 - Specialized distributors
 - General distributors
 - Wholesalers
 - Do-it-yourself/modern distribution
- Wide range of products including
 - Value added fire retardant
 - Environmental friendly
 - Specialized products

Key customers

- Key customers include major:
 - Specialized distributors

- General distributors

- Wholesalers

- Installers

Key success factors

- Product range
- On-time delivery / Product availability
- Inventory/WC management
- Cost leadership
- Channel management
- Customers' relationship

Action plan

- Continuously redefine product portfolio
 - Focus on high-end products (e.g. Fire Performance)
- Exploit channel/market specificity
 - Focus on wholesalers and installers
 - Protect positioning in high margin countries
 - Grow global accounts
- Continuously improve service level
- Benefit from changes in regulatory regime

Product overview

Business description

Integrated cable solutions highly customized to our industrial customers worldwide

Oil & Gas

Addressing the cable needs of research and refining, exploration and production. Products range from low & medium voltage power and control cables to dynamic multi-purpose umbilicals for transporting energy, telecommunications, fluids and chemical products

Renewable

Advanced cabling solutions for wind and solar energy generation contribute to our clients increased efficiency, reliability and safety

Surf (Subsea umbilical, riser and flowline)

SURF provides the flexible pipes and umbilicals required by the petro-chemicals industry for the transfer of fluids from the seabed to the surface and vice versa

Elevator

Meeting the global demand for high-performing, durable and safe elevator cable and components we design manufacture and distribute packaged solutions for the elevator industry

Auto & Transport

Products for trains, automobiles, ships and planes including the Royal Caribbean's Genesis fleet (world's biggest ship) & Alstom designed TGV (world's fastest train)

Specialties & OEM

Products for mining, crane, marine, rolling stock, nuclear and other niches

Key customers

Large and differentiated customer base generally served through direct sales

SURF – First steps to build up a global business

South America remains a key priority. Large off-shore explorations in West Africa and Apac

2012 Global oil & gas new discovery volumes by terrain

-
- Umbilical projects out of Brazil
 - Proven reserves
 - Unproven reserves

New frame agreement with Petrobras

- New frame agreement signed with Petrobras in Oct'13:
 - Umbilicals: 360km worth approx. \$260m (50% minimum purchasing commitment, orders to be received within 2 years for deliveries within 3/4 y)
 - Flexible: extension to 2016 of the existing frame agreement worth \$95m (no minimum purchasing commitment)

International business development

- First umbilicals orders delivered in 2012-13:
 - Egypt: hydraulic umbilical & accessories (Saipem)
 - Nigeria: electro-optical umbilical (Shell)
 - Indonesia: electro-hydraulic umbilical & accessories (ConocoPhillips)
 - Angola: dynamic optical umbilical (Total)

Competitive scenario

Our Telecom Business

Business description

Integrated cable solutions focused on high -end Telecom

Telecom solutions

Optical cables: tailored for all today's challenging environments from underground ducts to overhead lines, rail tunnels and sewerage pipes

Copper cables: broad portfolio for underground and overhead solutions, residential and commercial buildings

Connectivity: FTTH systems based upon existing technologies and specially developed proprietary optical fibres

MMS

Multimedia specials: solutions for radio, TV and film, harsh industrial environments, radio frequency, central office switching and datacom

Mobile networks: Antenna line products for mobile operators

Railway infrastructure: Buried distribution & railfoot cables for long distance telecommunication and advanced signalling cables for such applications as light signalling and track switching

Optical Fiber

Optical fiber products: single-mode optical fiber, multimode optical fibers and specialty fibers (DrakaElite)

Manufacturing: our proprietary manufacturing process for Plasma-activated Chemical Vapor Deposition and Licensed OVD Technology (600 unique inventions corresponding to > 1.4K patents) positions us at the forefront of today's technology

Key customers

Key customers include key operators in the telecom sector

Optical cables

Global overview

Market trends

- Demand function of level of capital expenditures budgeted by large telecom companies (PTT/incumbents as well as alternative operators) for network infrastructures, mainly as a consequence of:
 - Growing number of internet users data traffic
 - Diffusion of broadband services / other high-tech services (i.e. IPTV)

Key success factors

- Continuous innovation and development of new cable & fibre products
- Cable design innovation with special focus on installation cost reduction
- Relentless activity to maintain the highest quality and service level
- Focus on costs to remain competitive in a highly price sensitive environment

Strategic value of fibre

- Fibre optic represents the major single component cost of optical cables
- Fibre optic production has high entry barriers:
 - Proprietary technology or licenses difficult to obtain
 - Long time to develop know-how
 - Capital intensity
- When fibre optic is short, vertically integrated cable manufacturers leverage on a strong competitive advantage

Action plan

- Maintain & reinforce position with key established clients
- Further penetration of large incumbents in emerging regions
- Optimize utilization of low cost manufacturing units
- Expand distribution model in Domestic & Export
- Streamline the inter-company process
- Fully integrated products sales
- Refocus on export activities
- Increase level and effectiveness of agents

Telecom Cables Main Applications

Telecom – Solid drivers in optical confirmed despite weak 2013

Growing investments expected in South America and APAC
